

D1 Magnetic Base Drill

- The D1 is the most powerful, precise, portable magnetic drill in the industry.
- Uniquely engineered with a no maintenance rail system designed to extend the life of cutters and reduce cutter run out.
- Weighing only 23 lbs., the D1 cuts holes up to 1-3/8" in diameter through 2" thick mild steel. Only 14-3/4" tall, the D1 works in tight spaces and holds tight with its powerful "smart" magnet.
- Fewer parts than most drills, the D1 is readily serviced in the field, allowing this drill to work longer and harder.

D-2X Magnetic Base Drill

- 2" diameter annular cutter capacity
- 7/8" diameter twist drill capacity
- 2" maximum depth of cut
- #2 morse taper
- 1300 watt motor
- 2 speed gearbox
- Unique self adjusting gib system extends cutter life
- Weighing only 35 lbs.,
