Mounted Stone & Rasps

Rotary Files and Wood Rasps with 1/4" Shank
These tough, rugged files and rasps are made from carbon steel. Files have specially hardened, durable cutting edges for long life and can be used on many steels, bronze, fiberglass, plastic and many other materials. The wood rasp removes material in small hard to reach areas. They're ideal for projects which involve shaping and smoothing wood. The 1/4" shanks of Rasps and files make them ideal for power drills. All rotary files and rasps have a 1/4" shank.

ROTARY FILES AND WOOD RASPS					
DIA.	LENGTH	TYPE	RPM	ITEM #	PRICE EACH
