MetalMax Diamond Cut Off Wheels

- MetalMax delivers 1,000 or more cuts with no need for wheel changes. That is 30 times longer life than thin bonded cut-off wheels.*
- Because LENOX MetalMax is made with diamonds, it doesn't get smaller. The cutting depth stays the same throughout its life, meaning better control, reach and precision.
- MetalMax is recommended for multiple types of metal including steel, sheet metal, stainless steel, rebar, cast iron, aluminum** and non-ferrous metals

#1972924 with Diamond Knock Out				

*Average performance for 4.5" wheel in 1" carbon steel square tube vs thin bonded abrasive cut-off wheels.

** When cutting aluminum, it is recommended to apply cutting wax or other type of saw lubricant to avoid chip welding.
