

Combidisc Abrasive Discs

ALUMINUM OXIDE:

For universal grinding of ferrous metals and other materials.

NON-WOVEN DISCS:

Universal working of metals: e.g. cleaning, oxidation removal and light deburring.

Bench Grinding Wheels

ALUMINUM OXIDE:

For steel and all ferrous metals. Fast removal rate and long service life. Ideal for removing burrs on workpieces. Also used for sharpening edges of tools made of high speed steel.

SILICON CARBIDE:

For carbide and non-ferrous metals. Fast removal rate and long service life. Ideal for sharpening edges on cutting tools with carbide tips.

BENCH GRINDER BUSHINGS:

Provide a safe method of reducing the wheel arbor to accommodate various spindle sizes. The bushing should be flush on both sides of the wheel, and should not interfere with the flanges.

Rubber Ribbed Backing Pads
Backing pads are for use with 7/8" and quick change fiber discs. Ribbed design allow for better cooling, which improves discs life.
