Non-Ferrous Cutting Blades

- Ideal for cutting non-ferrous materials : Aluminum, Copper, Brass and Plastic
- 7-1/4" For all circular saws
- 10" For miter and cut-off saws
- 12" For miter and cut-off saws

Ferrous Cutting Blades

- Ideal for cutting all kinds of mild steel: Cold Rolled, Hot Rolled Pipe, Threaded Rod and More
- 7-1/4" Cuts mild steel up to 1/8" thick, for all circular saws
- 10" Cuts mild steel up to 1/4", threaded rod up to 1"
- 12" Cuts mild steel up to 1/4", threaded rod up to 1"
- 14" Cuts mild steel up to 1/4", threaded rod up to 1"

FOR NON-FERROUS METALS

7-1/4"	48	5,800	D0748CF	55.50
12" *	60	1,800	D1260CF	146.67
14" *	72	1,800	D1472CF	177.40
FOR WOOD (FRAMING)				
DIA.	TEETH	MAX RPM	PART NO.	PRICE
7-1/4"	24	8,000	D0724A	14.30

* Use only on dedicated low RPM metal cutting saws

Carbide Tipped Saw Blades

You won't find a longer lasting, higher performing or cleaner cutting blade anywhere. Steelmax blades are designed for clean and cool cutting of mild steel, stainless steel, aluminum and thin steel. Our blades are also designed to fit competitor's saws to increase their cutting efficiency.

FEATURES

- Blades fit competitor saws to improve their cutting performance
- Designed to deliver more cuts per dollar
- Clean cuts with fewer sparks and burrs
- High quality C6 tungsten carbide tips
- Designed with varying tooth counts and rake angles for specific purposes
- Cool cutting

FOR ALUMINUM
