

CONCRETE SCREW

Hex Drive

Concrete screws are ideal for use in concrete, brick or block base material. The threads of the screws actually cut threads into the base material — providing excellent holding values.

Each concrete screw is coated with a Blue Climaseal® coating. This coating provides excellent rust resistance.

PLASTIC TUBULAR ANCHORS

Typically used in plain walls, such as concrete. Made out of PVC. Easy to install, and used in a variety of applications such as mounting fixtures on concrete walls. Can also be used in drywall.

Simply drill hole using a masonry bit and hammer in the anchor. The anchor twists and distorts, locking it in place.
