

STEEL RIVETS with Steel Mandrels

Button Head

- Low profile head diameter is twice the rivet body diameter, providing adequate bearing surface for nearly all applications.
- Open-end buttonhead rivets offer the broadest selection of sizes available.

Large Flange

- Provide greater bearing surface for fastening soft and brittle facing materials and oversize facing holes.
- Work well with soft materials, where the increased flange diameter protects the integrity of the application.

Countersunk

- 120° countersunk rivets for applications where flush appearance is required.
